NEBA/SIMA provides a structured, stakeholder inclusive method to compare response options (e.g., mechanical recovery, dispersants, in situ burning, shoreline protection) and pick the strategy that minimizes overall impacts to people, environment, and infrastructure. The methodology is recognized and supported across industry good practice guidance (IPIECA/API/IOGP) and widely used to underpin response strategies and approvals.</i></p> <p>With: <b>Tristan Barston</b>, Principal Preparedness Solutions Advisor (Americas), <b>Oil Spill Response Ltd (OSRL)</b></p>	<p>Hosted by</p>
